Premier Miton Defensive Multi Asset Fund – Class A Shares

A sub-fund of Premier Miton Investment Funds

Class A Accumulation Shares, ISIN no.GB00B010Y517

Authorised Corporate Director - Premier Portfolio Managers Ltd.

Objectives and investment policy

To provide capital growth over the long-term being five years or more. Five years is also the minimum recommended period for holding shares in this fund. This does not mean that the fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested.

The fund manager will invest the fund's assets in a global, diversified portfolio of investments across a range of asset classes including equities (company shares), fixed income (including bonds issued by governments and companies), property (including Real Estate Investment Trusts), commodities, cash and cash like investments. Exposure to equity and fixed income assets will be obtained through direct investment, but the investments in property and commodities will typically be indirect. There will be a broad spread of underlying assets, although fixed income will usually be the largest single asset class.

The fund manager may also invest in shares of collective investment schemes covering global markets and will usually maintain a portfolio of at least 100 individual investments.

The fund manager will assess the broad economic environment, focusing on areas such as economic growth, inflation expectations and the outlook for interest rates, to determine the attractiveness of the asset classes in which the fund can invest.

The fund may invest in derivatives and forward transactions (these are contracts whose value is based on the change in price of an underlying investment), for the purposes of efficient portfolio management including hedging (hedging is designed to offset the risk of another investment falling in price).

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

You can buy, sell and switch shares in the fund on any UK business day. We will need to receive your instruction before 12 noon to buy shares at that day's price.

Terms explained:

Accumulation shares: any income made by the Fund will be reinvested to grow the value of your investment.

Funds: a general term used to describe collective investment schemes, such as unit trusts, open-ended investment companies and closed-ended investment companies.

Derivatives: this is a financial contract whose value is related to the value of an underlying asset or index, often used with the aim of managing risk or enhancing returns.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk ← | | | | | | | → Typically higher rewards, higher risk

The Fund is ranked as 4 because funds and portfolios holding similar assets have experienced medium rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The assets held by the fund are typically equities, bonds, property and alternatives which, as a mix of asset classes, tend to be diversified in nature but may also experience higher return volatility than bonds or money market instruments.

The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The indicator may not take fully into account the following risks of investing in this Fund:

- Interest rate risk:** the value of fixed rate corporate bonds will be sensitive to an unexpected increase in interest rates.
- Credit risk:** if the issuer of a security is unable to make income payments or to repay its debt.
- Operational risk:** arising from investments in overseas markets, in particular emerging markets, which may not have the same level of safekeeping and other controls as UK markets.
- Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.
