Premier Miton Worldwide Opportunities Fund – Class A

Class A Accumulation Shares, ISIN no.GB0031831026

Authorised Corporate Director - Premier Portfolio Managers Ltd.

Objectives and investment policy

To provide capital growth over the long-term being five years or more. Five years is also the minimum recommended period for holding shares in this Fund. This does not mean that the fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested.

The fund will invest in a range of investment companies. These include but are not limited to; closed end investment companies, investment trusts and real estate investment trusts. The fund manager can also invest in collective investment schemes including open-ended investment companies.

The investments will be across a broad range of asset classes including fixed income (including bonds issued by governments and companies), convertible bonds (bonds that can convert into company shares), company shares and property company shares (including real estate investment trusts).

The fund manager may also invest in other asset classes, which may include commodities (such as gold and timber), private equity (through listed investments), hedge funds and specialist financial assets (such as loans and insurance policies). Exposure will be obtained through collective investment schemes managed or advised by the Investment Manager or other investment companies.

The fund may invest in derivatives and forward transactions (these are contracts whose value is based on the change in price of an underlying investment) for the

purpose of efficient portfolio management, including hedging (hedging is designed to offset the risk of another investment falling in price).

The fund is actively managed which means that the fund manager will manage and adapt the portfolio depending on their assessment of the broad economic environment and market conditions.

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

You can buy, sell and switch shares in the fund on any UK business day. We will need to receive your instruction before 12 noon to buy shares at that day's price.

Terms explained:

Accumulation shares: any income made by the Fund will be reinvested to grow the value of your investment.

Funds: a general term used to describe collective investment schemes, such as unit trusts, open-ended investment companies and closed-ended investment companies.

Derivatives: this is a financial contract whose value is related to the value of an underlying asset or index, often used with the aim of managing risk or enhancing returns.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

The Fund is ranked as 5 because funds and portfolios holding similar assets have experienced medium to high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The underlying assets held by the funds in which the Fund invests are predominantly equities, fixed income, property, commodities and alternatives which can experience higher return volatility than bonds or money market instruments. The values of these can also be volatile due to the discounts, or premiums, on which the funds owned can move.

The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The indicator may not take fully into account the following risks of investing in this Fund:

- **Liquidity risk:** during difficult market conditions some securities in some locations may become more difficult to sell at a desired price.
- **Interest rate risk:** property companies tend to hold relatively high levels of debt and their share price can be sensitive to an unexpected increase in interest rates.
- **Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.
