

Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LF Miton Balanced Multi Asset Fund, F Accumulation, a fund within LF Miton Investment Funds (ISIN: GB00BF1CW039)

The fund is managed by Link Fund Solutions Limited, part of the Asset Services Division of Link Administration Holdings Limited.

Objectives and investment policy

Objective

The fund aims to provide long-term (greater than five years) capital growth.

Investment Policy

The fund will aim to achieve the investment objective by investing in a portfolio of global mixed assets comprising of equities, fixed income securities, property and commodities. Whilst a combination of asset classes will always be held, not all asset classes will necessarily be held all the time, with the exception of equities and equity related securities (such as ordinary and preference shares, global depositary receipts and American depositary receipts) listed or traded on Regulated Markets. Investments in equities and fixed income securities will be of a direct nature, and exposure will be gained indirectly in property and commodities. It is expected that equities will be the most significant holding in the portfolio most of the time. The fund may also invest in collective investment schemes, money-market instruments, cash and potentially higher risk areas, such as emerging market equities and sub investment grade bonds.

Essential features of the Fund

- The fund has the discretion to invest in the investments as described above with no need to adhere to a particular benchmark.
- The fund has no specific target market, asset class or geographic sector.
- Income from the fund will be added to the value of your investment.
- You can buy and sell shares in the fund on each business day.
- Derivatives and currency hedging arrangements may be used to manage the risk profile of the fund, reduce costs or generate additional income.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 4 because its volatility has been measured as average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Currency Risk: As the fund has exposure to overseas currencies, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Fixed interest securities are affected by trends in interest rates and inflation. If interest rates go up the value of capital may fall and vice versa. Inflation will also decrease the real value of capital. The value of a fixed interest security is also affected by its credit rating.
- Counterparty Risk: As the fund may enter into derivative agreements and currency hedging arrangements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the fund, receiving less than is due or receiving nothing.
- Operational Risk: Emerging markets tend to be more susceptible to large short term swings than more established markets. There is also a greater risk of being unable to buy or sell securities or that other parties may default and not meet their obligations, causing loss to the fund.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

Charges for this Fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	7.00%
This is the maximum that might be taken out of your money before it is invested.	
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	0.90%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The entry charge shown is a maximum figure. In some cases investors may pay less. You can find out the actual charges from your financial advisor or distributor.

The ongoing charges figure is an estimate of the charges as at 01 January 2019. This figure may vary from year to year but is currently capped on a discretionary basis at a maximum of 0.90%. The ongoing charges are taken from the income of the fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

You may also be charged a dilution levy on entry to or exit from the fund.

For more information about charges, please see the prospectus Sections 3.5 & 7, which may be obtained free of charge from the address in 'Practical Information' below.

Past performance

- Because the share class has less than one calendar year's performance, there is insufficient data to provide a useful indication of past performance.
- Launch date for the fund: 29 January 2018.

Practical information
